

BY "ALL-SEASON", WE MEAN EVERY SEASON.

WE ARE LISTENING

Drivers are expecting more and more performance out of their all-season tires. The demand for passenger and truck tires has increased while the trend for winter tire demand is decreasing. The expectation for truer winter performance out of all-season tires has never been greater. Crafting a tire for the rigors of "every season" driving is what the Nexen Tire engineers set out to accomplish and the results are in...Introducing the newest pattern to Nexen's award winning lineup, the N'Priz AH8. With improved snow performance features to further your all-season driving confidence.

THE BEST JUST GOT BETTER

The wear resistance and winter performance of the N'Priz AH8 are far better than those of the CP672, and its total performance, including handling and noise performance, has been significantly improved as well.

LONGER TREAD LIFE

The use of carbon blocks with a high surface area increases wear resistance by maximizing the surface area in contact with the rubber and optimizing heat dissipation.

ALL-SEASON TRACTION

The wave sipes, which are optimally designed using a state-of-the-art simulation program, reinforce snow traction and provide excellent all-season driving performance.

IMPROVED SNOW BRAKING PERFORMANCE

The best combination of a new polymer and silica improves snow braking performance.
